SMARTYNA

SMALL, VERSATILE, POWERFUL

The new **SMARTYNA** brushing machine was designed and manufactured by Airclean to meet the demands of its customers.

*"we need a small, portable, powerful brushing machine with timed brush rotation reversal and adjustable brush speed"*

Airclean answers with **SMARTYNA**

Dimensions: cm. 60x42x26

Weight Kg: 20

Portable on Trolley with wheels

Adjustable brush speed

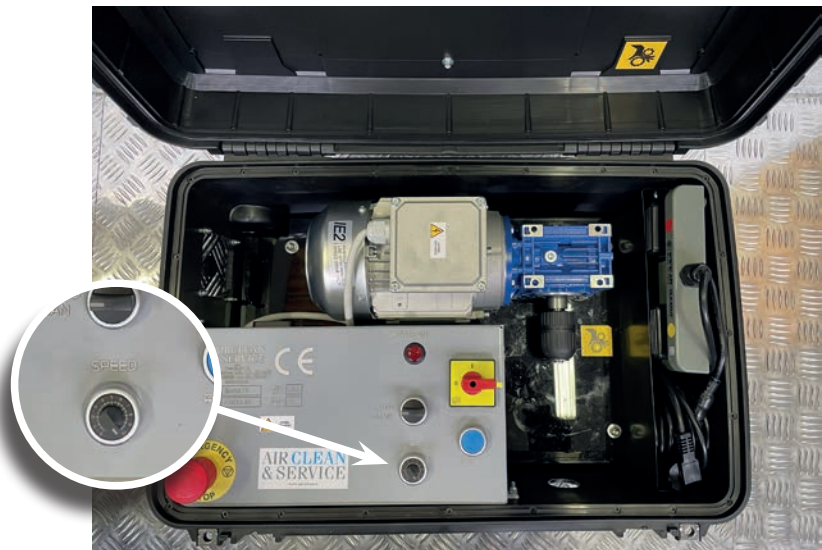

Single-phase motor 0.55 kW

## EVERYTHING IN THE SUITCASE

in this way the machine is always protected and easy to transport

## ADJUSTABLE SPEED

from 0 to 550 RPM

**SMARTYNA**  
so much power  
under control  
in a single **small**  
and extremely  
**compact** space.

# SMARTYNA

With **SMARTYNA** it becomes easier and more productive to operate in places such as INDUSTRIAL KITCHENS - TRAINS - BOATS - VMC SYSTEMS.

**SMARTYNA** also becomes a profitable resource for classic reclamation jobs if used in combination with larger size brushing machines.

For smaller ducts it is the professional breakthrough to screwdriver drills to rotate the brushes on extensions.

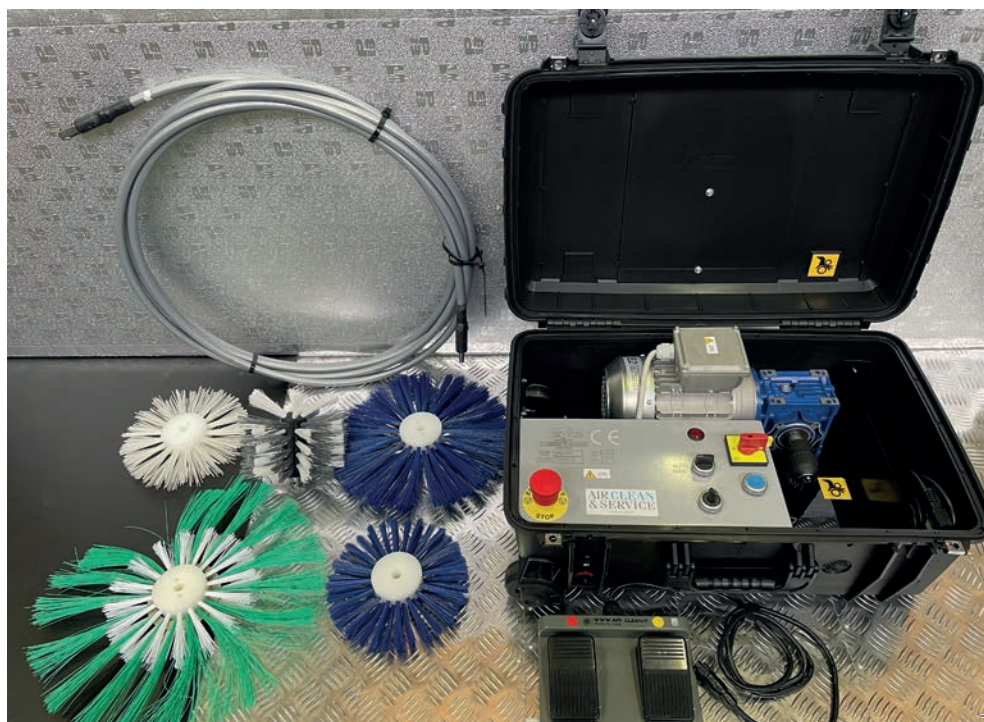

With **SMARTYNA** it is possible to use cables from 6 - 8 - 10 - 12 mm in diameter  
Brush size range from 80 mm to 600mm

To use larger brushes and jobs in which a lot of rotation power is needed such as steel brushes, it is necessary to use a **special REINFORCED cable** (optional) equipped with a special reinforcement to prevent the brush ... as they say in jargon, "going back" and become unmanageable in the vigorous and descaling brushing phase.

**NOTE:** it is possible to request the reinforced cable equipped with a hose for detergent/foaming liquids for washing with chemicals or for blowing compressed air when necessary.

**SMARTYNA** is a single-phase electric brushing machine that allows the operator to choose whether to use the foot switch or to opt for brushing with automated brush rotation inversion.

TECHNICAL DATA	SMARTYNA
Voltage	220V
Frequency	50 Hz
Fuse	16A
Electrical cable	5 meters
Brush direction control	Pedal board SX DX Automatic gearbox via three-position switch
casing	Plastic suitcase
Dimensions	620x400x260mm
Weigh	21kg
IP class	50
Emergency switch	Located on the control panel
Brush rotation speed	130/550 rpm (with speed variator)
Cable attachment	Spindle output reducer
